SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Specific target organ toxicity - repeated exposure, Category 2	H373: May cause damage to organs through prolonged or repeated exposure.
Chronic aquatic toxicity, Category 3	H412: Harmful to aquatic life with long lasting effects.
Harmful	R48/22: Harmful: danger of serious damage to health by prolonged exposure if swallowed.
Dangerous for the environment	R52/53: Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
2.2. Label elements

SECTION 4: First aid measures

4.1. Description of first aid measures

General advice	:	Never give anything by mouth to an unconscious person. When symptoms persist or in all cases of doubt seek medical advice.
Inhalation	:	If inhaled, remove to fresh air. If breathing is difficult, give oxygen. If breathing is irregular or stopped, administer artificial respiration. Get medical attention.
Skin contact	:	In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention if irritation develops and persists. Wash contaminated clothing before re-use.
Eye contact	:	In case of eye contact, remove contact lens and rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Get medical advice/ attention.
Ingestion	:	If swallowed, call a poison control centre or doctor immediately. Rinse mouth with water. DO NOT induce vomiting unless directed to do so by a physician or poison control center.
4.2. Most important sympto	oms	and effects, both acute and delayed

Symptoms	: Inhalation may provoke the following symptoms:, Irritation, Cough
	: Effects of breathing high concentrations of vapour may include:, Drowsiness, Dizziness
	: Skin contact may provoke the following symptoms:, Irritation with discomfort or pain, redness or rash, itching or swelling., Allergic reactions
	: Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhoea
	: Eye contact may provoke the following symptoms:, Irritation, Pain, tearing, swelling, redness, or temporary visual impairment.
4.3. Indication of any immed	ate medical attention and special treatment needed
Treatment	No specific intervention is indicated. Treat symptomatically.
CTION 5: Firefighting measure	S
5.1. Extinguishing media	
Suitable extinguishing media	: Use extinguishing measures that are appropriate to local circumstances and th surrounding environment.
	: Water spray, Dry chemical, Carbon dioxide (CO2)
5.2. Special hazards arising	rom the substance or mixture
Specific hazards during firefighting	: Hazardous decomposition products formed under fire conditions. (see also section 10) Avoid breathing decomposition products.
5.3. Advice for firefighters	
Special protective equipment for firefighters	: Exposure to decomposition products may be a hazard to health. Wear self- contained breathing apparatus for firefighting if necessary.
Further information	: Evacuate personnel to safe areas. Stop spill/release if it can be done with minimal risk. Do not allow run-off from fire fighting to enter drains or water courses.
CTION 6: Accidental release m	easures
6.1. Personal precautions, p	otective equipment and emergency procedures
Personal precautions	: Avoid contact with skin, eyes and clothing. Ensure adequate ventilation. Wear suitable protective equipment.
6.2. Environmental precaution	ns
Environmental precautions	: Prevent further leakage or spillage if safe to do so. Prevent product from entering drains. Clean contaminated floors and objects thoroughly while

observing environmental regulations.

6.3. Methods and materials for containment and cleaning up

Methods for cleaning up : Contain spill. Soak up with inert absorbent material. Collect and contain contaminated absorbent and dike material for disposal. Keep in suitable, closed containers for disposal. Ventilate the area. Clean contaminated floors and objects thoroughly while observing environmental regulations.

Other information : Dispose of in accordance with local regulations.

6.4. Reference to other sections

For personal protection see section 8. For disposal instructions see section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Advice on safe handling	: Avoid inhalation, ingestion and contact with skin and eyes. Do not use in areas without adequate ventilation. For personal protection see section 8.	3
Advice on protection against fire and explosion	: Normal measures for preventive fire protection.	
7.2. Conditions for safe s	rage, including any incompatibilities	
Requirements for storage areas and containers	: Keep containers tightly closed in a cool, well-ventilated place. Do not store or consume food, drink or tobacco in areas where they may become contaminated with this material. Do not reuse empty container.	ļ
Other data	: Stable under normal conditions.	
7.3. Specific end use(s)

8.2. Exposure controls		
Engineering measures	:	Ensure adequate ventilation. Maintain air concentrations below occupational exposure standards. General mechanical ventilation is normally adequate but use local exhaust where necessary to maintain exposures below acceptable limits.
Eye protection	:	Wear safety glasses or coverall chemical splash goggles.
Hand protection	:	Material: Protective gloves complying with EN 374. Gloves must be inspected prior to use. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough. The choice of an appropriate glove does not only depend on its material but also on other quality features and is different from one producer to the other. The exact break through time can be obtained from the protective glove producer and this has to be observed. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it.
Skin and body protection	:	Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place. Lightweight protective clothing and safety shoes are recommended.
Hygiene measures	:	Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin, eyes and clothing. Use with adequate ventilation. Keep container closed. Keep away from food and drink. Wash hands before eating, drinking, or smoking. Remove contaminated clothing and protective equipment before entering eating areas. Wash contaminated clothing before re-use.
Respiratory protection	:	No personal respiratory protective equipment normally required. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Consult the respirator manufacturer to determine the appropriate type of equipment for a given application. Observe respirator use limitations specified by the manufacturer.
