

VINILO EFECTO FIBRA CARBONO

VFCAB/30

Length Tolerance	+/-200mm
Width Tolerance	+/-5mm
Material for face film	polymeric calendared vinyl
Film Thickness	110micron PVC
Material of Release Paper	PEK(Air-Bubble free, double PE)
Weight of Release Paper	140 +/-10 g/sqm
Solvent Adhesive	40μ

Standard size	152cm x 50M
Temperature range	-10°C~+60°C
Shelf Life	1 year (Stored at 18-25°C)
Durability (outdoor)	2-3years

Colors Available	brilliant colors
Characteristic	3D carbon fiber film is characterized in its highly flexible polymeric material, no trace of residue after removed, good resistance to the low/high temperature(-10°C~+60°C), easily applied, good effect on curving parts.
Application	Car body(automobile)decoration or protection, can be stuck on the car surface as fashionable decoration/or making graphics/letters by computer cutting/ screen printing/ can also decorate any flat surface as per customer preference
