

Technical Data of Item		
Brand / Item	Brildor <b>PB40</b>	
Code	12.0402.54	
Format	4.500	m
Aprox. Net weight per unit	116,26 (CV 2,95%)	g
Support	Spool Model CA-110 R	
Packaging	12 units in box type A1 4 boxes type A1 in box type B1	
Construction: Nominal Title/ Strands	250(2) = 125 x 2	dTex
Fiber Measured Title	116,9 (±3,0%)	dTex
Filaments per Strand	36	
Filament Section	Trilobal	
Luster	Bright	
Tenacity of fiber	39,8 (±4,5%)	cN/Tex
Elongation of fiber	23,3 (±6,0%)	%
C.R. a 180°C	11,5 (±1,2%)	%
Cohesion factor	22 (±3,0%)	Knots/m
Average measured Title	38.706	m/Kg
Final Twist Direction	Z	
Finishing	Lubricated	
Minimum Average Resistance	1.005	g
Resultant Tenacity	39,8	cN
Elongation	26,9	%

The systems used to measure have been adapted to take into account the specific properties of sewing treads. Although the proportioned data has been elaborated with the intention of being most trustworthy, they don't constitute the responsibility equivalent of a quality control.
