Use your heat press.

Before using for first time, activate Cricut Autopress at cricut.com/setup. Follow on-screen instructions to set up press and connect to Design Space®.

· Get time & temperature settings for your project at cricut.com/heatguide

· Position project on **Pressing Mat (4)**

· Use **Handle (1)** to lower heat plate

· Press handle to start timer

Note: Timer starts automatically

· Heat plate lifts automatically when complete

· Carefully remove project

CAUTION: Heat Plate (3) gets very hot during use. **Platen (5)** may become hot during use. Handle with care. Read safety instructions before use.
